Dear Kent and Jimmy,

We wanted to take a moment to thank you for constructing our beautiful home. From the very beginning in developing the plans to the end with landscaping, your involvement was invaluable. Building a house can be tiresome and stressful, and we appreciate you taking the stress off of us. We found a builder who could communicate clearly and effectively, the process could not have been any easier.

Our construction site was the cleanest I have ever seen. That was very important to us because we could take our children with us while watching the construction and not worry about them getting hurt on nails, broken glass, or other dangerous materials. Your sub contractors were all pleasant and efficient. Every time we went to the house there was something new.

Throughout the process your expertise was extremely valuable. Your advice helped us stay within our allocated budget and still receive a quality home with many upgrades. The constant communication, updates, and feedback was greatly appreciated. Our home was completed before the date promised because you were driven to meet your commitment.

Jimmy and Kent, we cannot thank you enough for all your hard work in constructing our dream home. You exceeded our expectations and we cannot truly express our appreciation for your high level of integrity, quality, and standards that you reflected during the process. We will gladly serve as a reference for you in the future and hope that others will be lucky enough to have you involved in their home building projects.

Thank you again,

Dan and Mandi Justesen
